- B&G Vulcan
- B&G Zeus Touch
- B&G Zeus2 Black Box
- B&G Zeus2 W

Device Registration

Before you can download free C-MAP Genesis Social Map charts or your own custom-made C-MAP Genesis maps for on-the-water use in your boat, you must first register your compatible sonar/GPS unit (AKA “chartplotter” or “plotter”). You may register as many as four plotters.

To register your plotter(s), start by logging in to your C-MAP Genesis dashboard at www.genesismaps.com and clicking “Add Device” in the “Plotters” section near the bottom of the page. For complete, step-by-step directions, [click this link](#).
